

Instructions | Safe use of Anti-Viral Surface Disinfectant

We recommend the following precautions when using this product.

You **must** wear protective Rubber, Nitrile or similar gloves whilst applying this product. It should not come into contact with your skin and is intended for use on hard surfaces only.

(If contact with skin occurs, please wash off with soap and water immediately)

You **should** wear protective goggles/eyewear to prevent splashes of disinfectant entering the eye.

(If splashes do enter the eye, please flush out eyes **immediately** with fresh water)

There is no requirement for respiratory PPE such as masks to be worn but care should be taken to avoid the possibility of splashes entering the mouth.

(If this product is swallowed please seek medical attention **immediately**)

**For full health and safety information please request our Safety Data Sheet, this will have also been supplied with our Delivery of the Disinfectant product.
