

DI WATER GENERATOR

FS Portable

The latest generation machines for your water purification requirements.

- **200 L/hr rapid production**
- **Fully portable**
- **Mains or Battery Operated**
- **40" RO Membrane**
- **Low Energy Consumption**
- **Low Maintenance**
- **Compact Space Saving Design**

FLUID SCIENCE **Portable** DI WATER GENERATOR

The FS Portable water generator is an ideal standalone system which utilises RO and DI technology to deliver 200 litres per hour of deionised water. This allows you to deliver large amounts of deionised water on-site and you are ready to work instantly.

The FS Portable is very compact and can be moved around swiftly throughout the workplace and over any terrain, making it the most versatile water generator in our catalogue.

You can choose between a mains operated or a battery operated system.
