

### Product Features:

- Lightweight and Portable
- Antiviral solution included that has been proven to successfully eradicate COVID-19.
- Covers up to 2000m<sup>3</sup> area
- Quick and simple to use

The Fluid Science FO-300 Ultra Low Volume Fogger is a lightweight and portable system that is ideal for both surface and area disinfection in offices, store rooms, canteens, retail premises, hotel rooms, domestic properties, cars, vans, boats and more.

The FO-300 works by expelling a fine, almost invisible mist into the atmosphere which eventually settles on all surfaces including those impossible to reach by conventional methods. The careful design and shape of the FO-300 has resulted in the weight being evenly distributed making it comfortable to carry over the shoulder.

Setting the flow rate control at level 2 will produce a dry fog, suitable for areas such as offices or where textiles or other sensitive materials / merchandise are exposed.

The powerful 1250w 220v electric motor and the ability to adjust particle size from 5 µm up 50 µm, makes this machine unique in this class, and suitable for the application of disinfectants, biocides, fungicides and pesticides.

Regular fogging with approved disinfectant such as our AntiViral Surface Disinfectant will help prevent the cross-infection of viruses such as Coronavirus, MRSA and many more.

### Product Specifications:

Motor	1250w 110v / 220v
Tank Capacity	4 Litre
Output Flow Rate	0-60 l/h
Droplet Size	5-50 micron
Empty Weight	3.5 kg
Dimensions	52 x 30 x 16 Cm
