

## Instructions | *Hand Stand*

1

Position your hands under the nozzle and press your foot down on the bottom pump once as illustrated. This will dispense the hand sanitiser product into your hands.

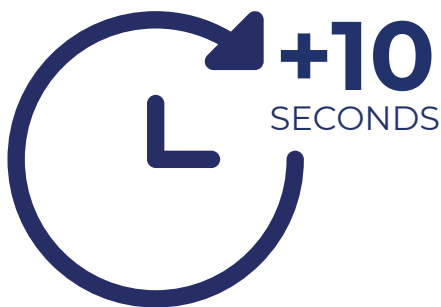

2

Next, rub the sanitiser product in thoroughly between fingers and by wringing hands together, as if you are washing them as normal.

3

Continue this process for at least 10 seconds to ensure full coverage of the hands and include wrists. Repeat the process if you feel full coverage has not been sufficiently cleaned.
